

Home Assignment

Once you have completed all 27 phases of the Moderation Layer, generate a complete Postman collection covering all the phases.

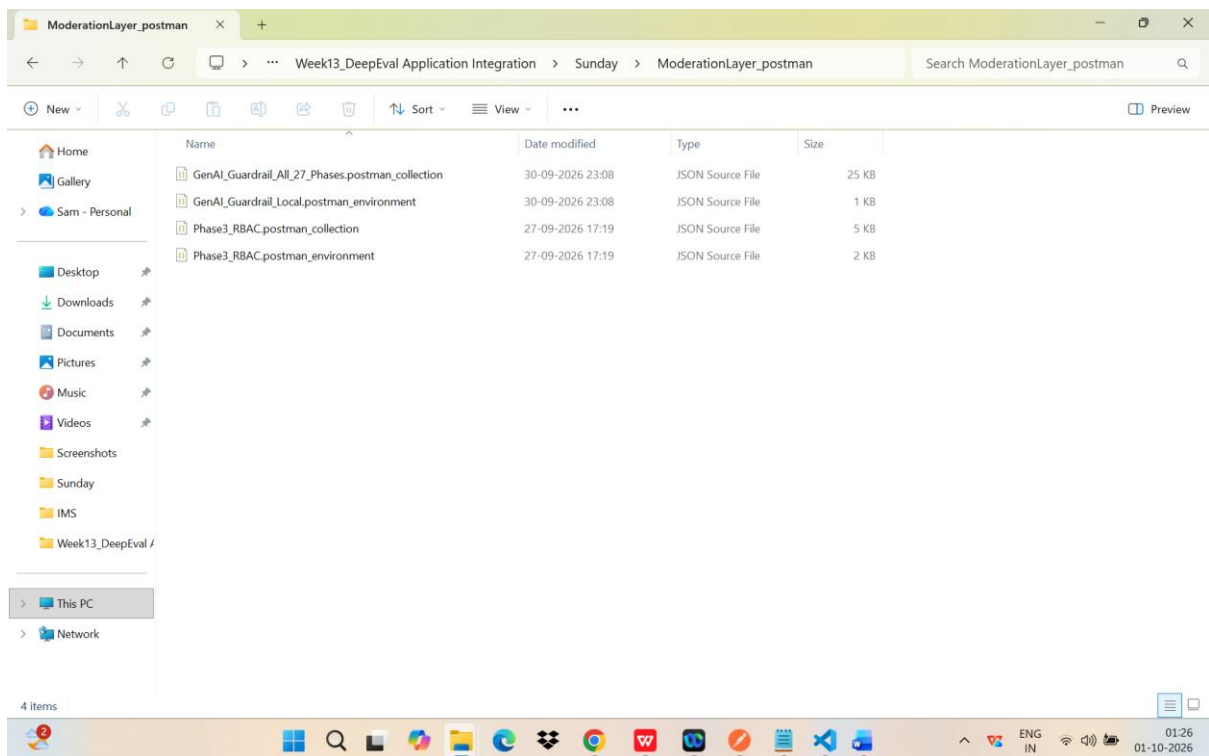

Download the Postman collection and add it to the existing RAG application folder.

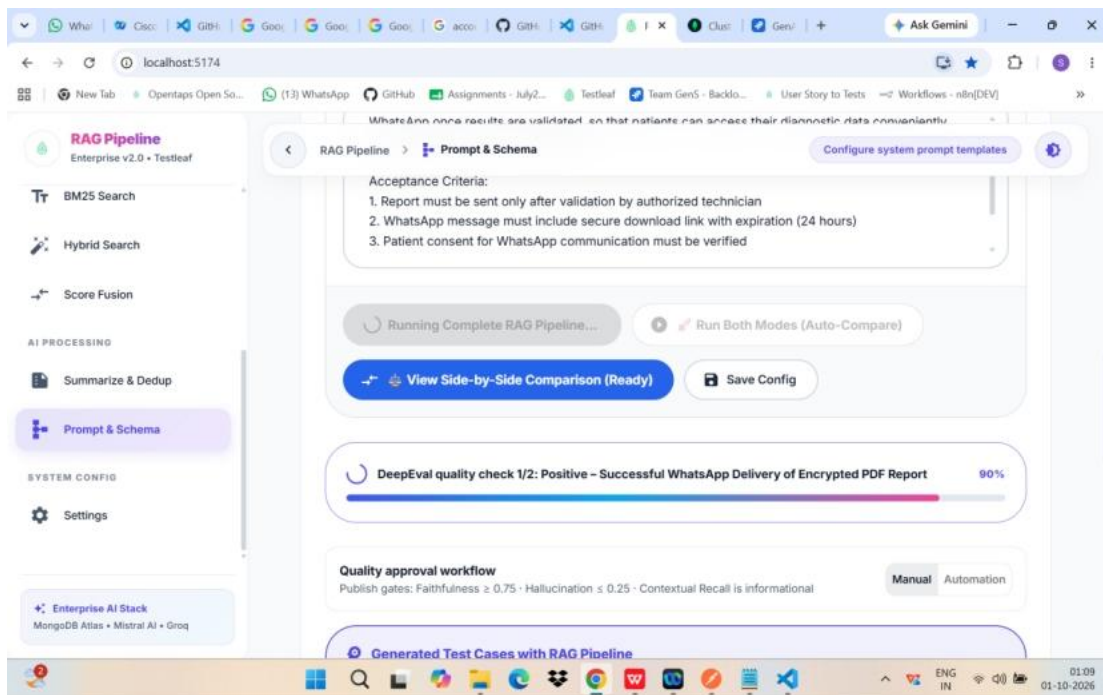

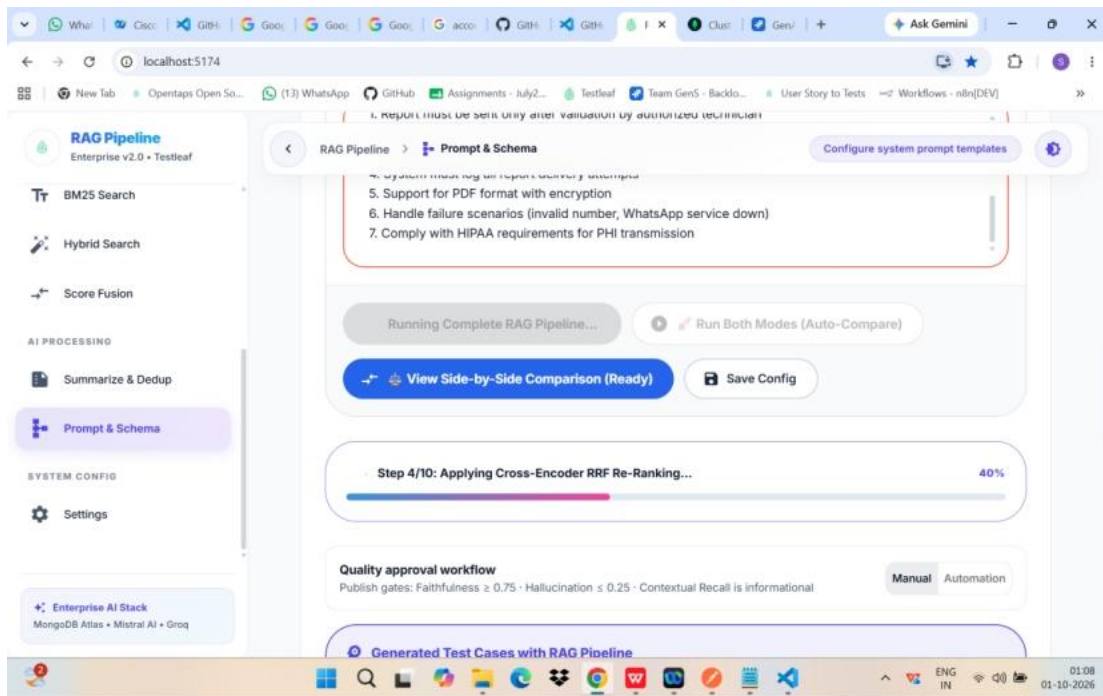

Then, write a prompt to integrate the Moderation Layer with the RAG application. After completing the integration, run the application and verify the Moderation Layer from the RAG application's frontend—both before sending the input to the LLM and before displaying the LLM's response to the user.

Postman Collection of 27 phases added to RAG
