

Assignment:

Enhance the existing application by implementing a feature that automatically categorizes the generated test cases into standard testing types such as Smoke, Sanity, Regression, Functional.

Once the test cases are generated, the application should classify each test case into the most appropriate category and display the categorized results in a structured and user-friendly format

The new functionality should seamlessly integrate with the existing test case generation workflow without impacting current features

Analyze the all files which is impacted , Implement the changes in the code once i approve the changes.
