 Submit

Form automated with  n8n

The screenshot displays the n8n web interface for a workflow named 'Sel_To_Pw_Code_convertor'. The workflow is shown in the 'Editor' view, with a notification banner indicating 'Workflow executed successfully'. The workflow canvas shows a sequence of steps including 'Set Node', 'Wait', 'Loop Over Items', 'Call Test...', 'Merge', 'Code in Java...', 'Compression', and 'Form'. The 'Logs' section shows a 'Compression' step with a success message. The 'INPUT' section displays two items: 'file1' (CasePage.txt) and 'file2' (HomePage.txt). The 'OUTPUT' section shows the result of the 'Compression' step, which is a zip file named 'playwright_pages.zip'.
