

Home Assignment 1: LangChain Memory

Use the qa-bot-ts_langchain application and its Postman collection to practise and understand how LangChain memory works. Test the application with multiple questions and verify whether it remembers the previous conversation context.

The screenshot displays the Visual Studio Code interface for the 'qa-bot-ts' project. The Explorer sidebar on the left shows the project structure, including files like 'dist', 'documents', 'node_modules', 'src', '.env', '.gitignore', 'package-lock.json', 'package.json', and 'tsconfig.json'. The main editor window shows the '.env' file with the following configuration:

```
.env
33 EMBEDDING_DIMENSION=1024
34
35 # LLM Re-ranking Configuration
36 LLM_RERANKING_ENABLED=true
37 # LLM Re-ranking Configuration
38 LLM_RETRIEVAL_TOP_K=10
39
40 # Documents Configuration
41 DOCUMENTS_FOLDER=./documents
42
43 # Weights for scoring
44 HYBRID_VECTOR_WEIGHT=0.6
45 HYBRID_KEYWORD_WEIGHT=0.4
46
47 # Server
48 SERVER_URL=http://localhost:8787
49
```

Below the editor, the Terminal window shows the chat history and a response:

```
5. [User]: Now show me only the ones in Bangalore
6. [AI]: An error occurred while filtering candidates: 429 {"error":{"message":"Request t...
[ChatMemory:conv_1789225109221_gsa16absr] Total: 6 messages
[ChatMemory:conv_1789225109221_gsa16absr] Cached search results: 10
=====
[chat_1789225330718_gviskdqz] Sending response to client
=====
```

The status bar at the bottom indicates the current position is Line 26, Column 26, with 4 spaces, UTF-8 encoding, LF line endings, and the Dotenv environment variable loader active. The system tray shows the date and time as 20:40 on 12-09-2026.

{{baseUrl}}/health

The screenshot shows the Postman interface with a GET request to `{{baseUrl}}/health`. The response is a 200 OK status with a JSON body. The JSON body contains the following data:

```
{
  "status": "healthy",
  "timestamp": "2026-09-12T15:08:22.174Z",
  "model": {
    "provider": "groq",
    "model": "qwen/qwen3.6-27b",
    "temperature": 0.2
  },
  "retrievalPipeline": "ready",
  "activeConversations": 1
}
```

The interface also shows a sidebar with collections, including 'QA Bot TS - LangChain API Copy' and 'Health & Status'. The 'Health Check' endpoint is selected, and the response is displayed in the 'Body' tab.

{{baseUrl}}/search/resumes

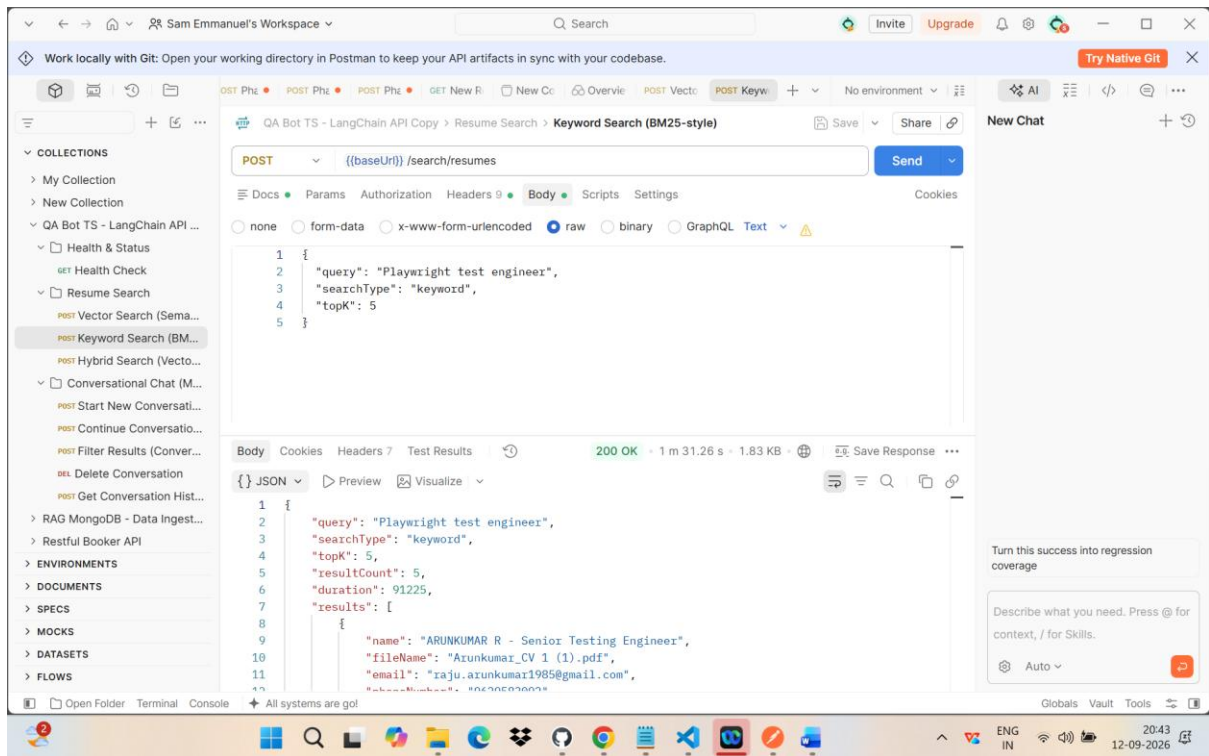

The screenshot shows the Postman interface with a POST request to `{{baseUrl}}/search/resumes`. The request body is a JSON object with the following data:

```
{
  "query": "Selenium Java automation tester",
  "searchType": "vector",
  "topK": 5
}
```

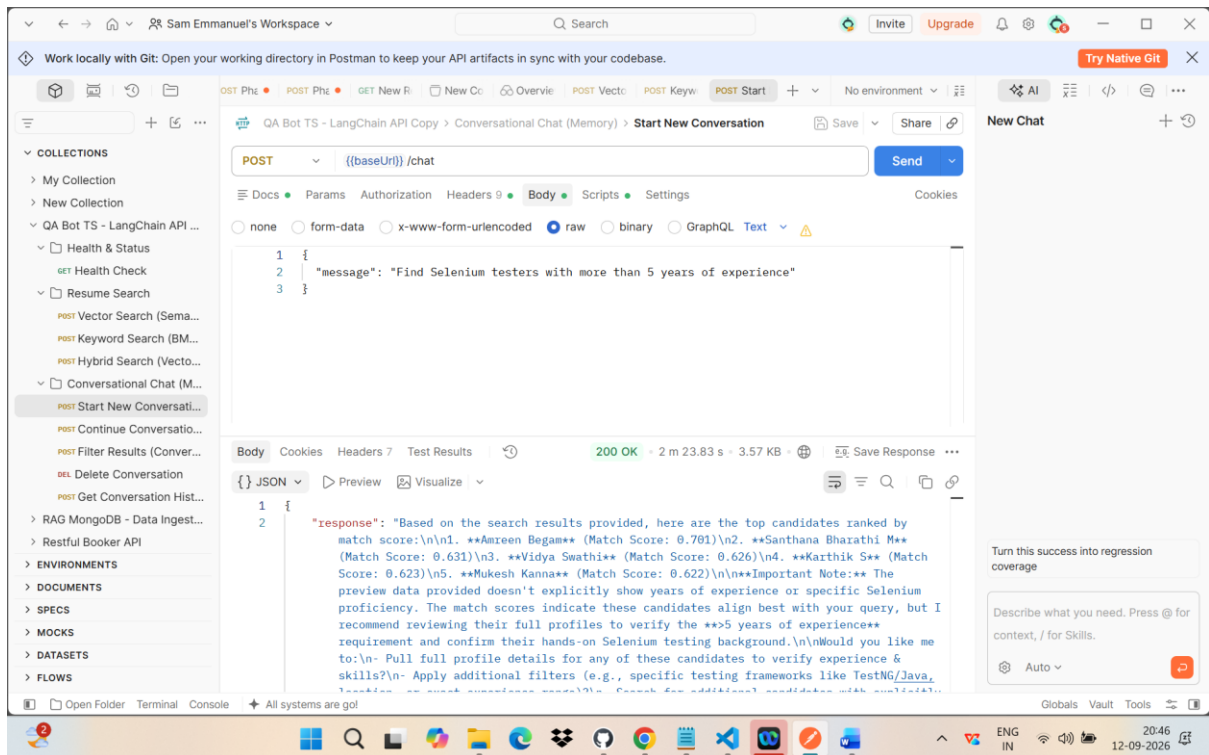

The response is a 200 OK status with a JSON body. The JSON body contains the following data:

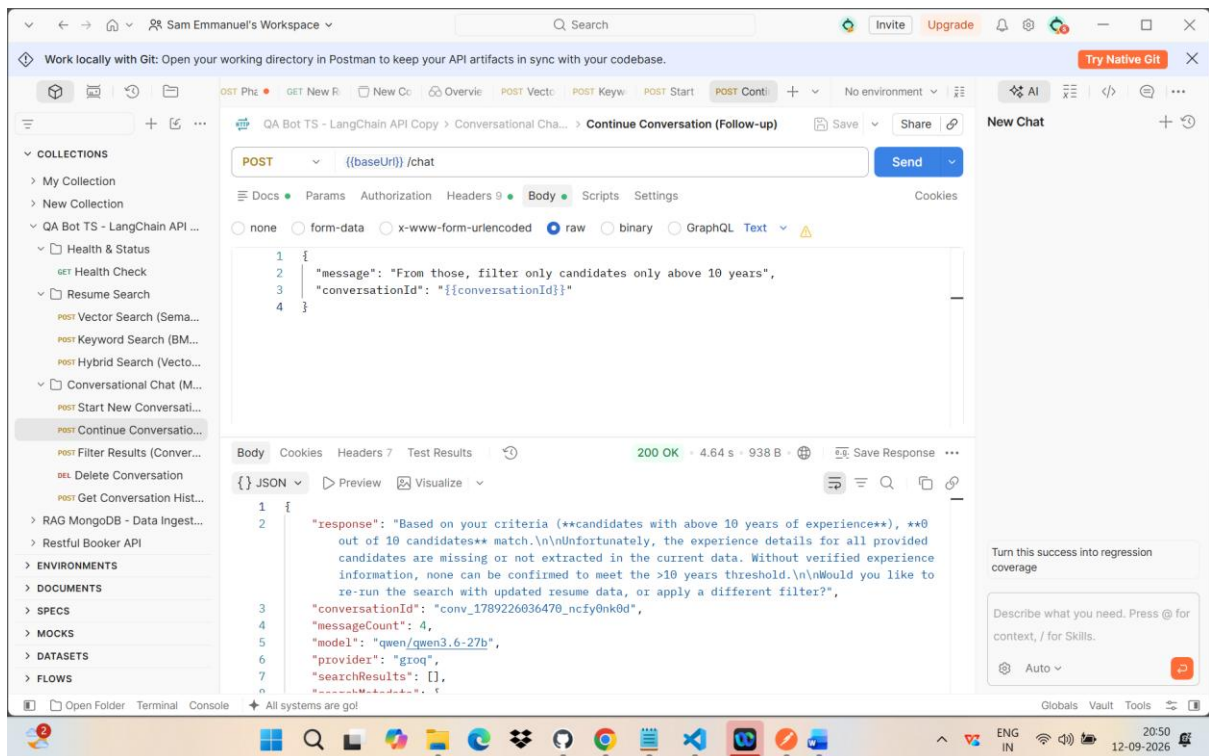

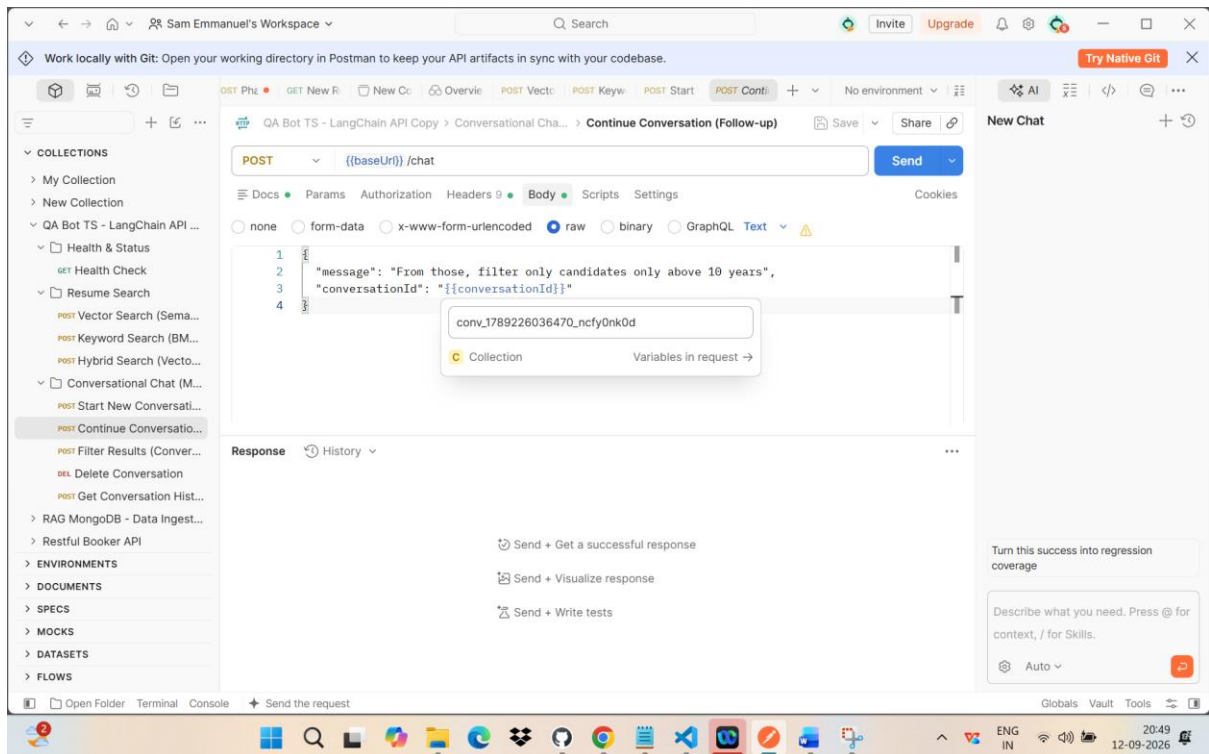

```
{
  "query": "Selenium Java automation tester",
  "searchType": "vector",
  "topK": 5,
  "resultCount": 5,
  "duration": 110187,
  "results": [
    {
      "name": "Theegela Sahitya Bharathi",
      "fileName": "Sahitya Bharathi Theegela .pdf",
      "email": "t.sahityabharathi24@gmail.com",
      "phoneNumber": "9898989898"
    }
  ]
}
```

The interface also shows a sidebar with collections, including 'QA Bot TS - LangChain API Copy' and 'Resume Search'. The 'Vector Search (Semantic)' endpoint is selected, and the response is displayed in the 'Body' tab.
